HIRESPHERE

A Task Based Hiring Platform for Skill-First Recruitment.

Skill. Prove. Hire.

Presented by:

Rishitha Khandesh

PROBLEM STATEMENT:

Traditional recruitment primarily relies on resumes to shortlist candidates for interviews. While resumes provide information about academic qualifications, certifications, and projects, they often fail to accurately represent a candidate's practical skills, problem-solving ability, and job readiness. As a result, recruiters may overlook talented candidates while shortlisting applicants whose resumes appear stronger on paper but do not necessarily reflect their actual capabilities.

USER RESEARCH:

Objective:

Understand the hiring challenges faced by fresh graduates and recruiters to design a more skill-focused recruitment platform.

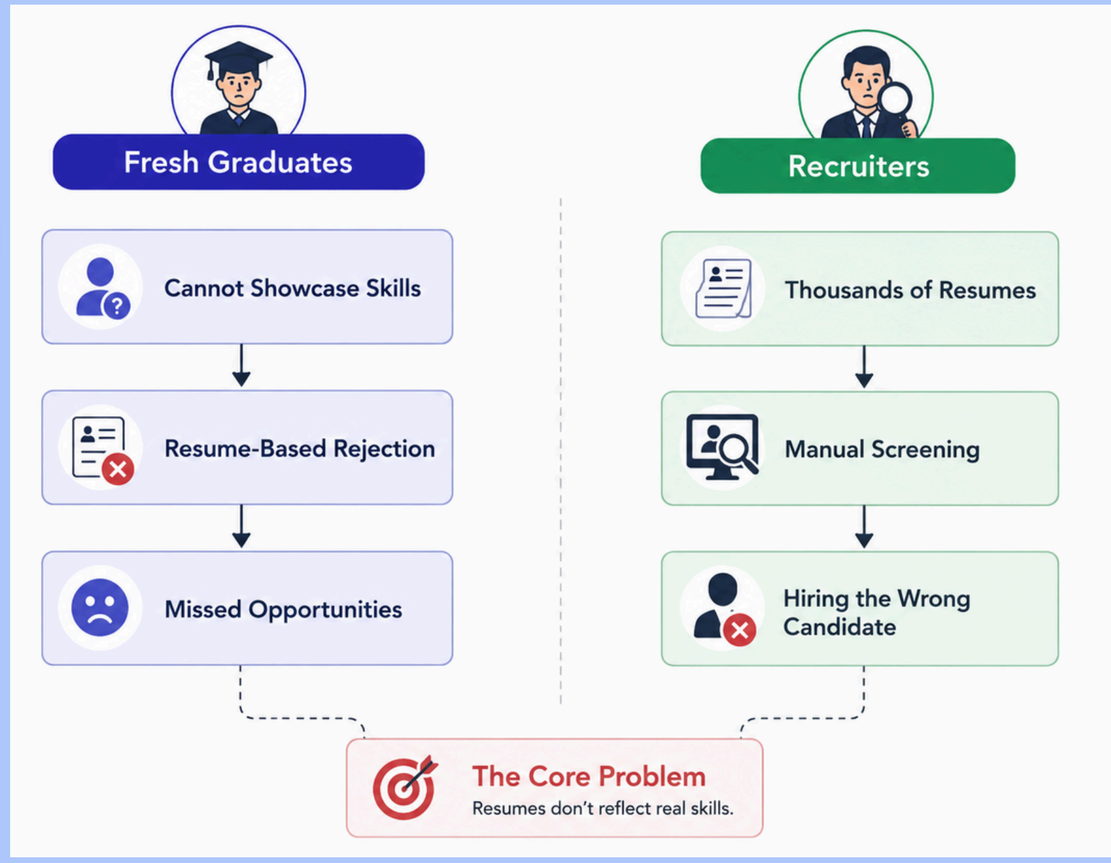
Target Users:

👨‍🎓 Fresh Graduates:

- Struggle to receive interview opportunities despite having good skills.
- Limited work experience makes resumes less competitive.
- Practical abilities are difficult to demonstrate through resumes alone.
- Resume screening often filters candidates before they can showcase their skills.

🏢 Recruiters / Hiring Teams

- Receive a large number of applications for each job opening.
- Manual resume screening takes significant time.
- Difficult to identify candidates with genuine practical skills.
- Interviews are sometimes conducted with candidates who are not job-ready.



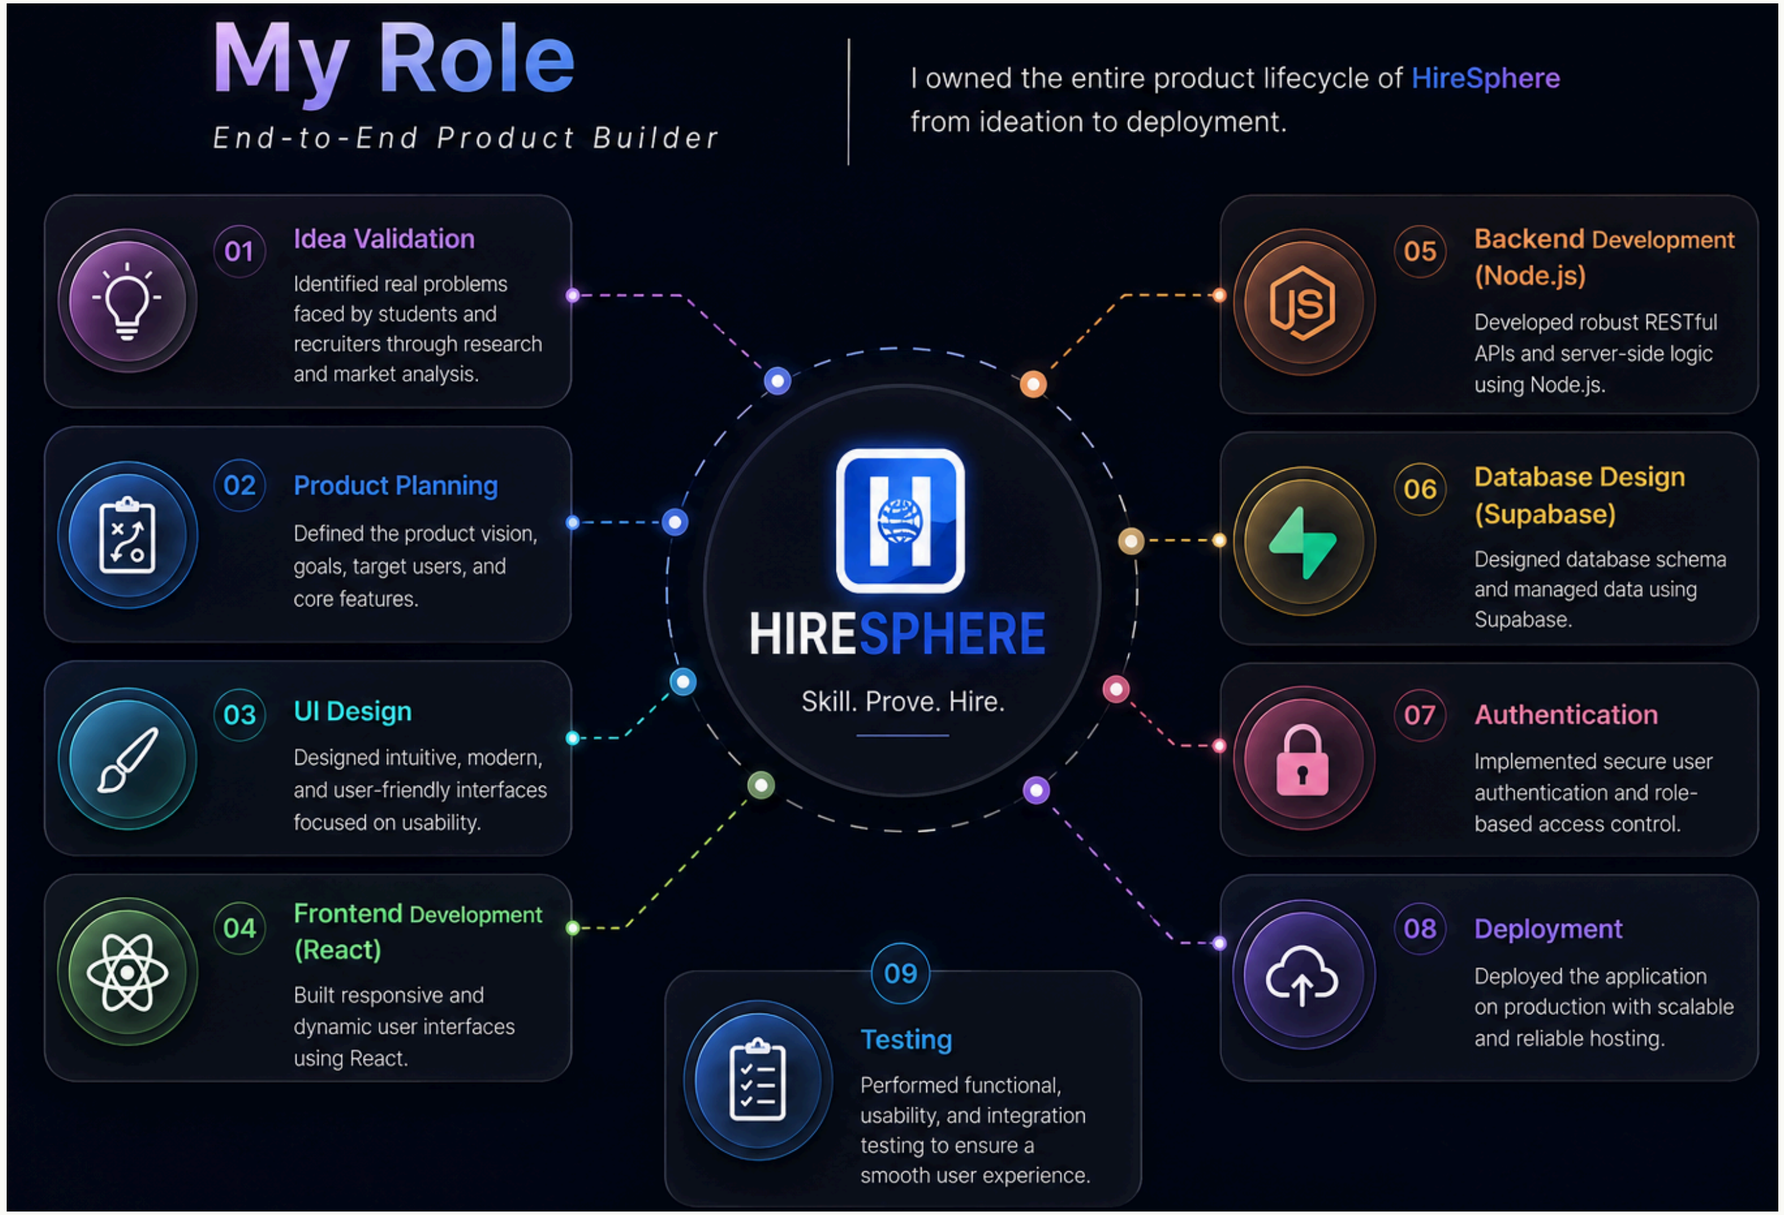
Current Challenges:

- Fresh graduates have limited or no work experience to showcase on their resumes.
- Recruiters receive thousands of applications during campus and off-campus hiring, making manual shortlisting difficult.
- Resumes provide information about education and projects but do not accurately reflect practical skills.
- Companies spend significant time interviewing candidates who may not have the required job-ready skills.
- Many skilled freshers lose interview opportunities because they cannot effectively demonstrate their capabilities through a resume alone.

Existing Limitations:

- Resume-based shortlisting is not sufficient to assess practical skills.
- Technical competency is usually evaluated only during later interview rounds.
- Recruiters lack an efficient way to identify skilled freshers before scheduling interviews.
- Talented candidates may be filtered out despite having the required abilities.

MY ROLE:



My Role
End-to-End Product Builder
I owned the entire product lifecycle of HireSphere from ideation to deployment.
01
Idea Validation
Identified real problems faced by students and recruiters through research and market analysis.
02
Product Planning
Defined the product vision, goals, target users, and core features.
03
UI Design
Designed intuitive, modern, and user-friendly interfaces focused on usability.
04
Frontend Development (React)
Built responsive and dynamic user interfaces using React.
HIRESPHERE
Skill. Prove. Hire.
05
Backend Development (Node.js)
Developed robust RESTful APIs and server-side logic using Node.js.
06
Database Design (Supabase)
Designed database schema and managed data using Supabase.
07
Authentication
Implemented secure user authentication and role-based access control.
08
Deployment
Deployed the application on production with scalable and reliable hosting.
09
Testing
Performed functional, usability, and integration testing to ensure a smooth user experience.

PROPOSED SOLUTION:

HireSphere

HireSphere is a task-based hiring platform that enables companies to evaluate candidates through real-world challenges instead of relying solely on resumes.

How It Solves the Problem:

Instead of asking,

"What have you done?"

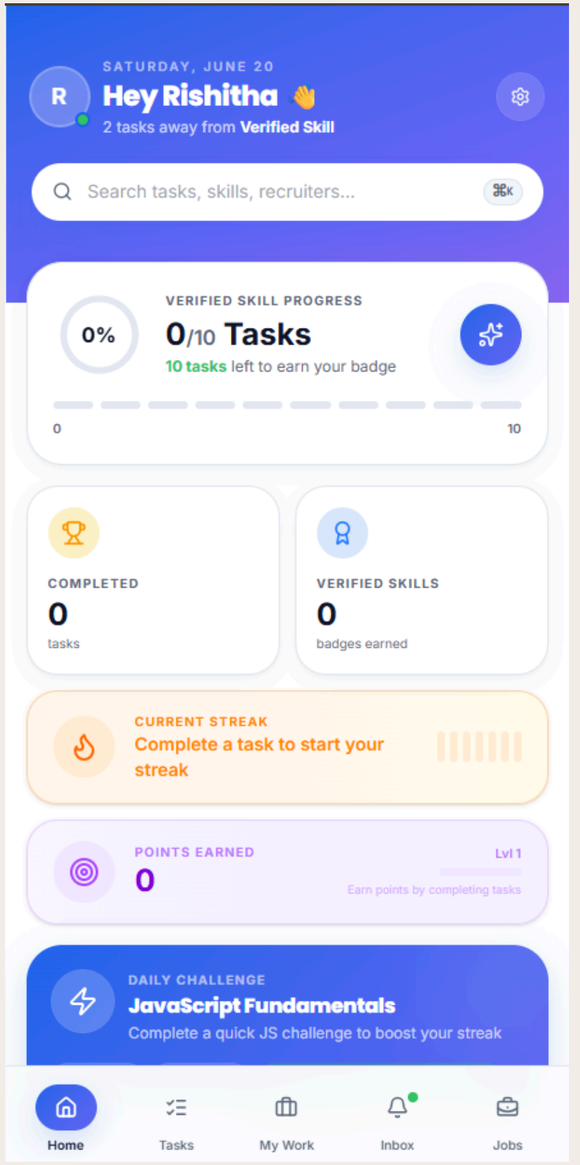
HireSphere asks,

"What can you do?"

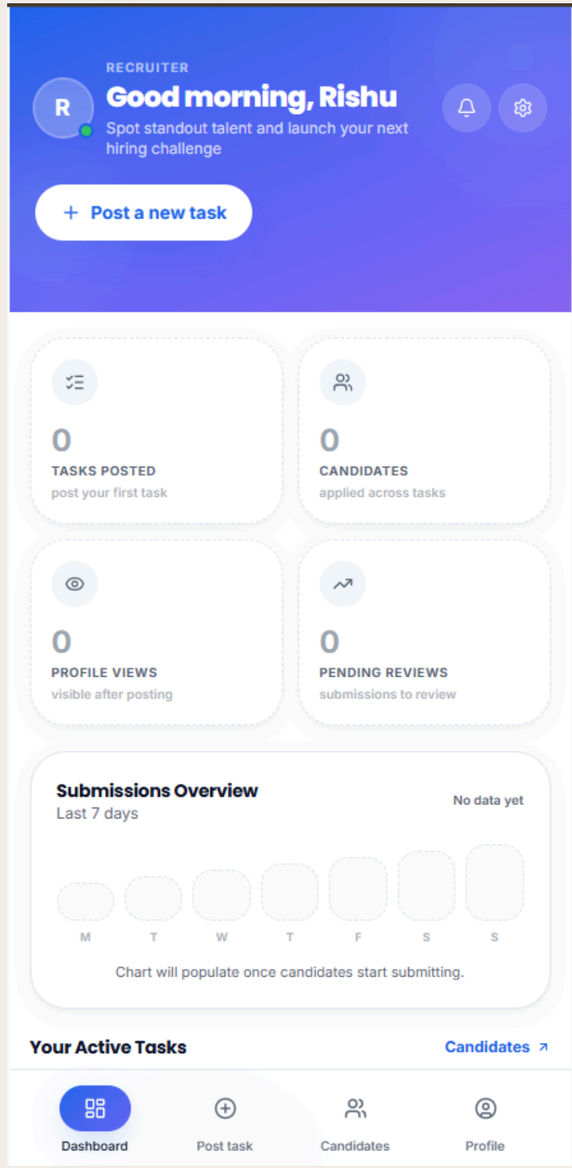
Candidates complete practical tasks designed by employers.

The Recruiters evaluates performance and ranks candidates based on demonstrated skills.

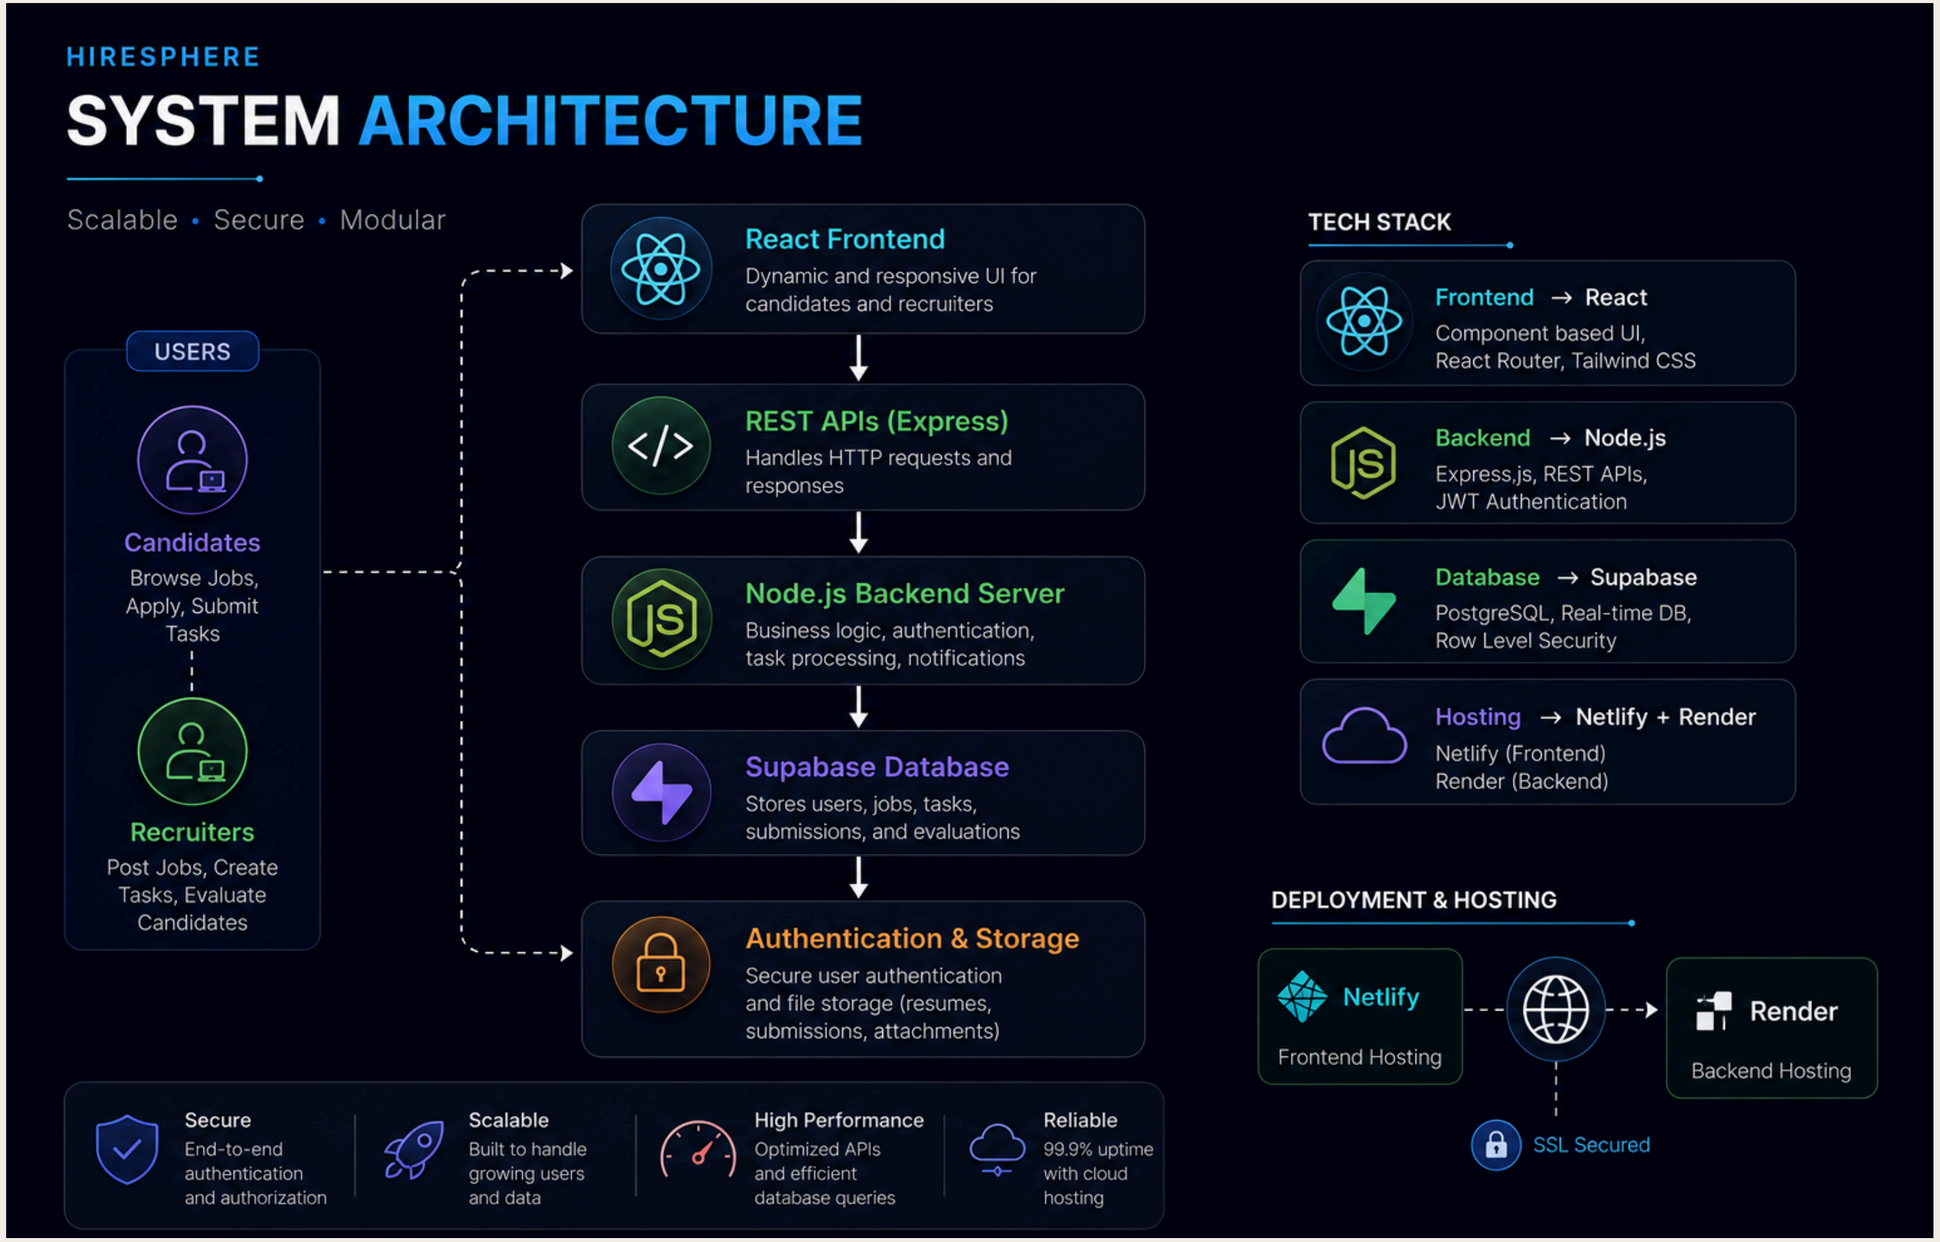
Candidate Dashboard



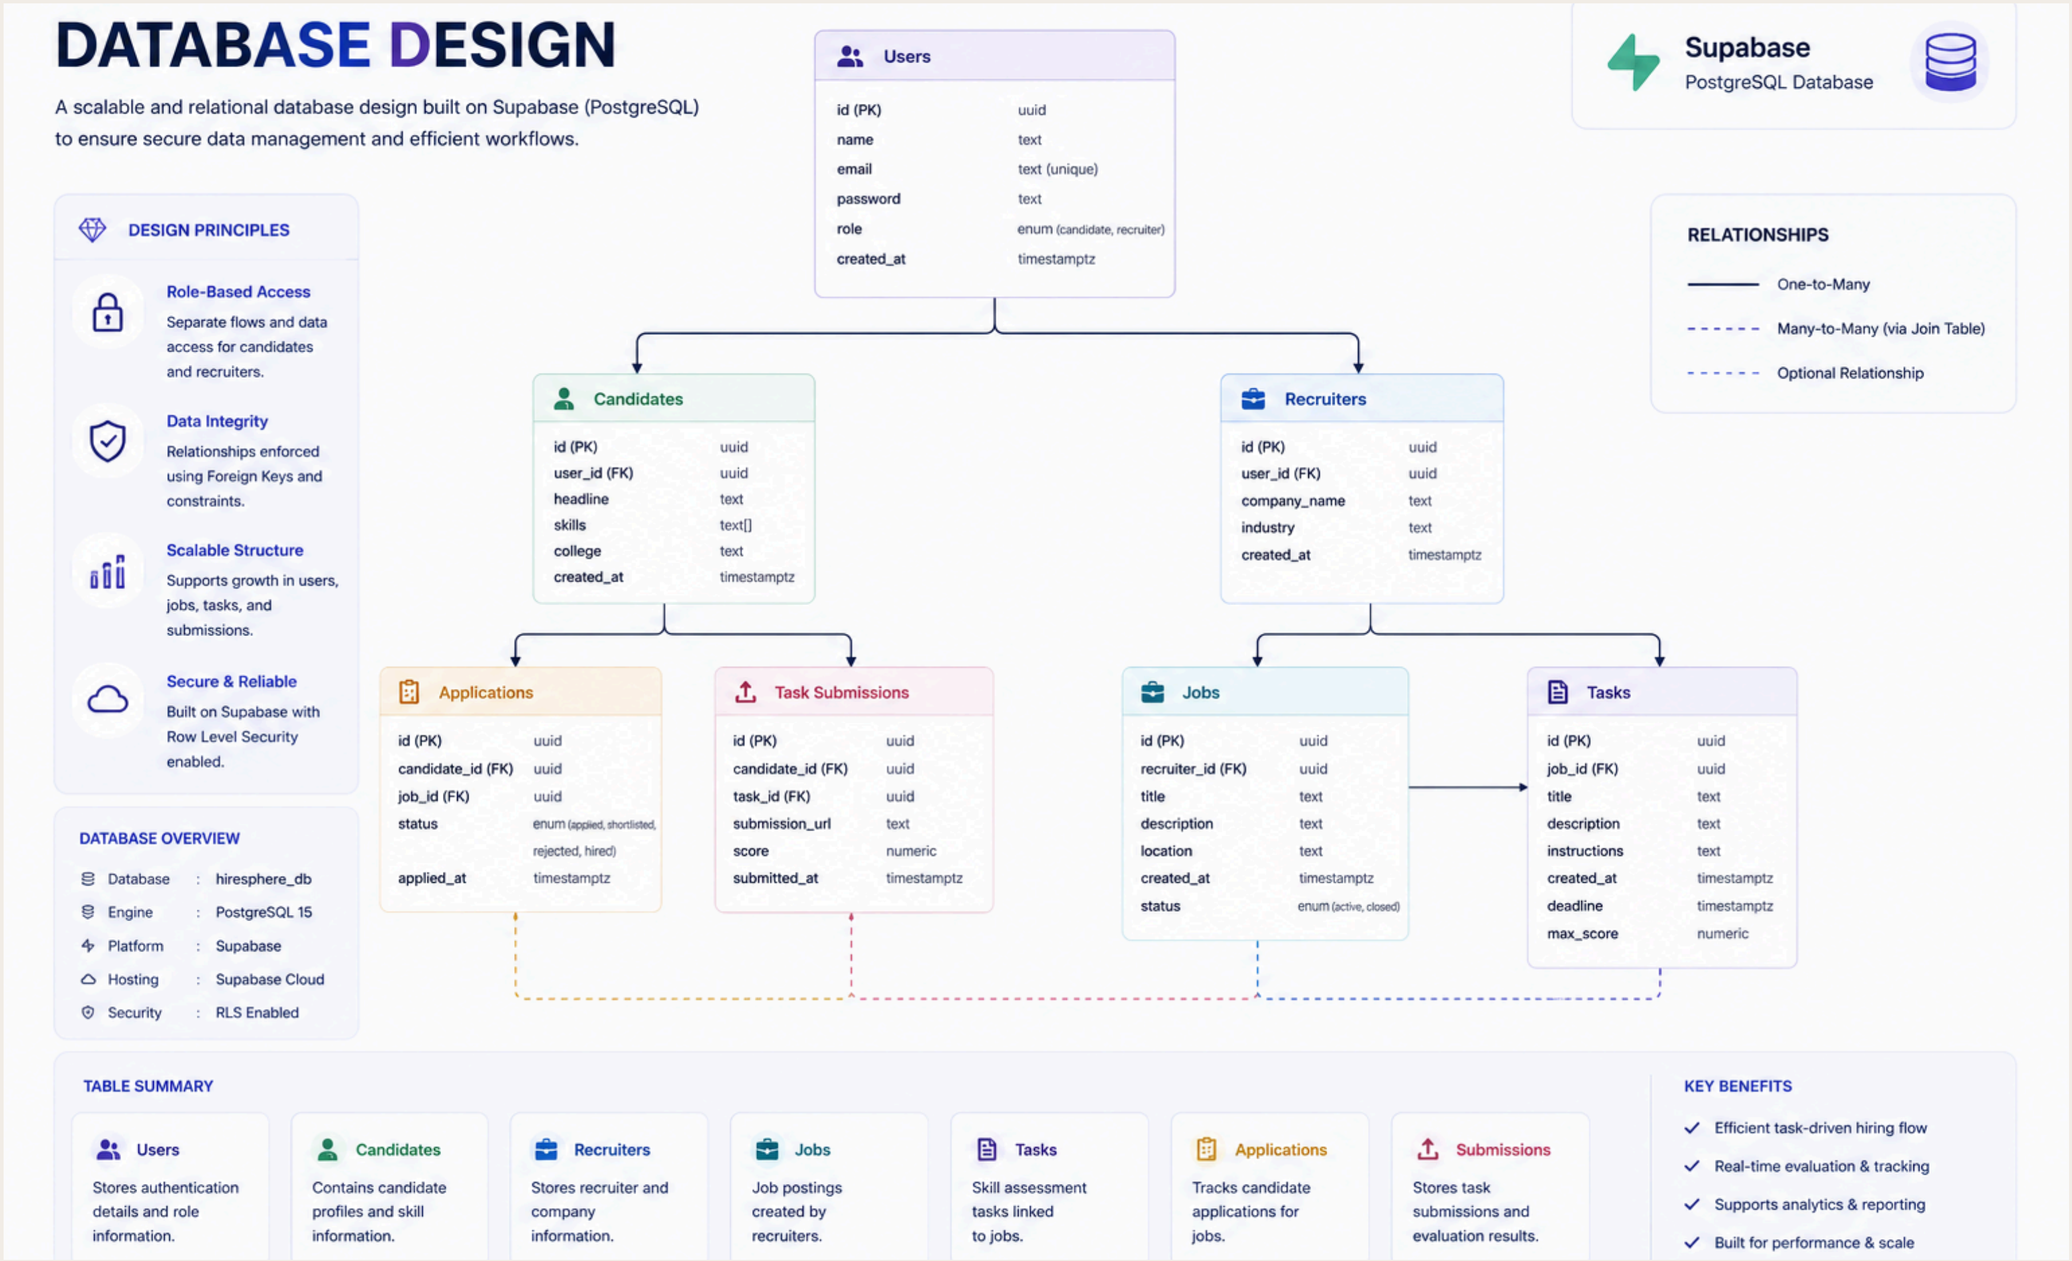
Recruiter Dashboard



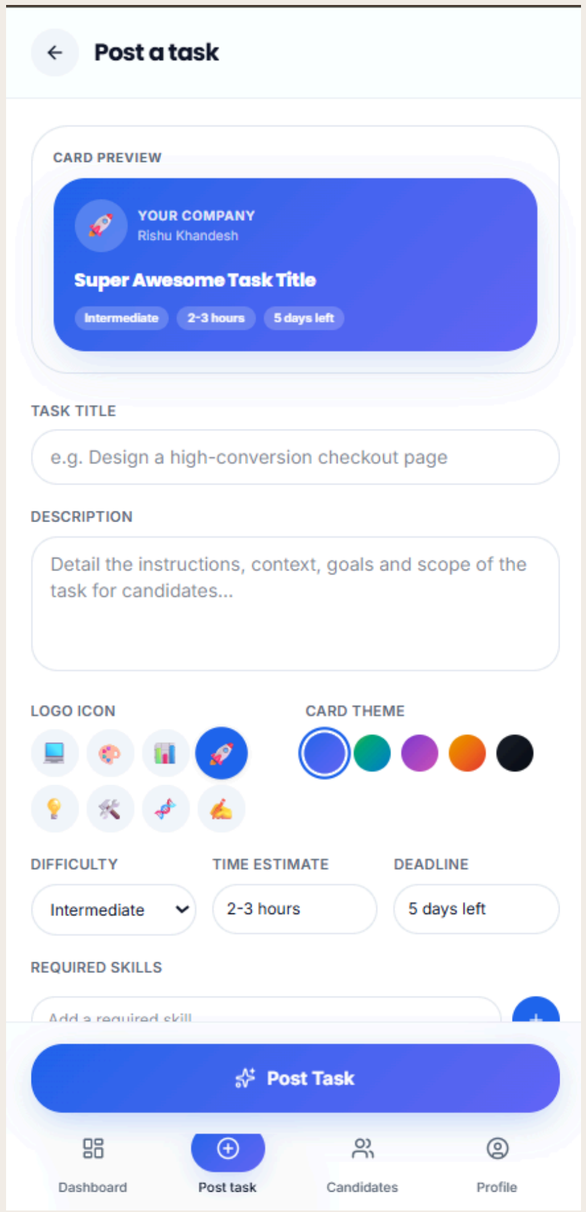
SYSTEM ARCHITECTURE:

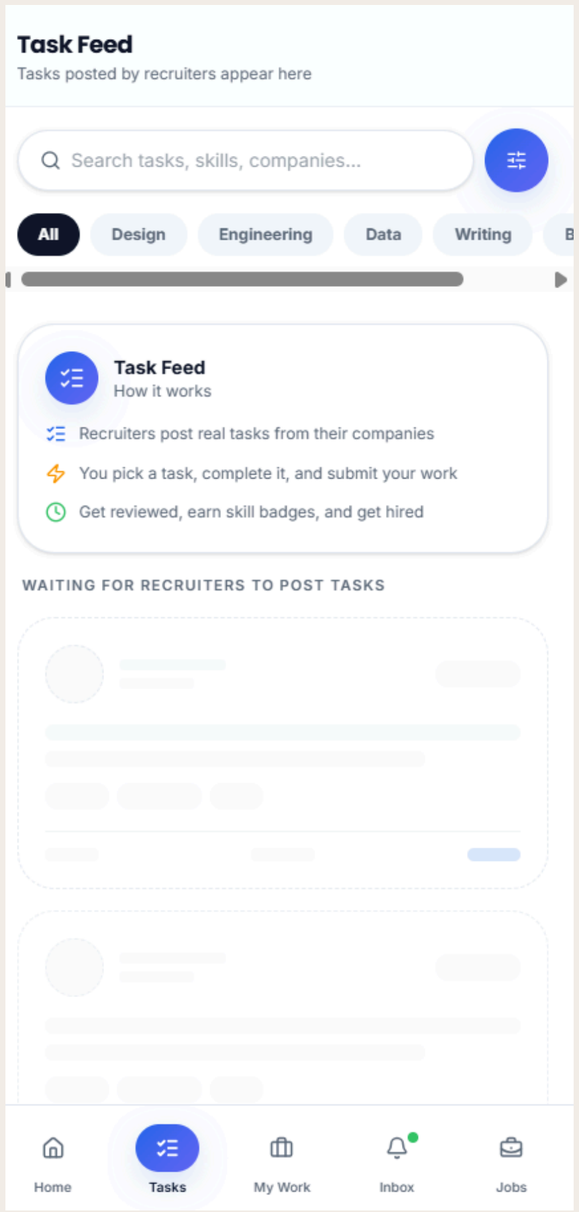


DATABASE DESIGN:



Unique Innovation:





- Task-Based Candidate Evaluation
- Role-Specific Hiring Challenges
- Skill-Based Interview Shortlisting
- Fair Opportunities for Freshers
- Recruiter-Customized Challenges
- Opportunity Beyond Resume Quality

CANDIDATE DASHBOARD:

🎯 Purpose:

A centralized workspace that helps candidates discover opportunities, complete skill-based tasks, and track their hiring progress.

Key Features:

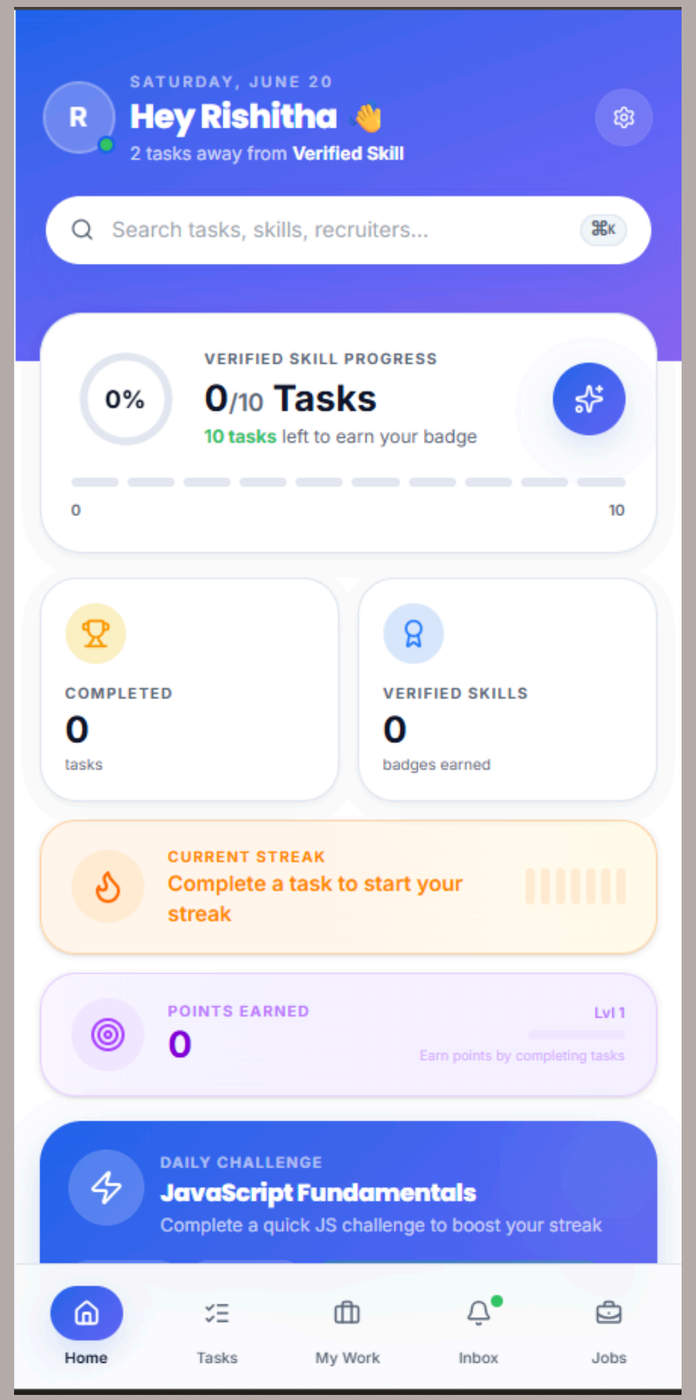
- 📋 Available Tasks – Browse recruiter-created challenges.
- 📈 Skill Progress – Track completed tasks, badges, and profile completion.
- 💼 Apply Jobs – Apply through practical task submissions.
- 👤 Profile – Showcase skills, certifications, and achievements.

Product Value:

- Encourages skill-first hiring.
- Improves candidate engagement.
- Simplifies the job application process.

Design Principles:

- Clean dashboard layout
- Card-based UI
- Progress visualization
- Mobile-responsive design



RECRUITER DASHBOARD:

🎯 Purpose:

A unified dashboard that enables recruiters to manage the complete hiring workflow efficiently.

Key Features:

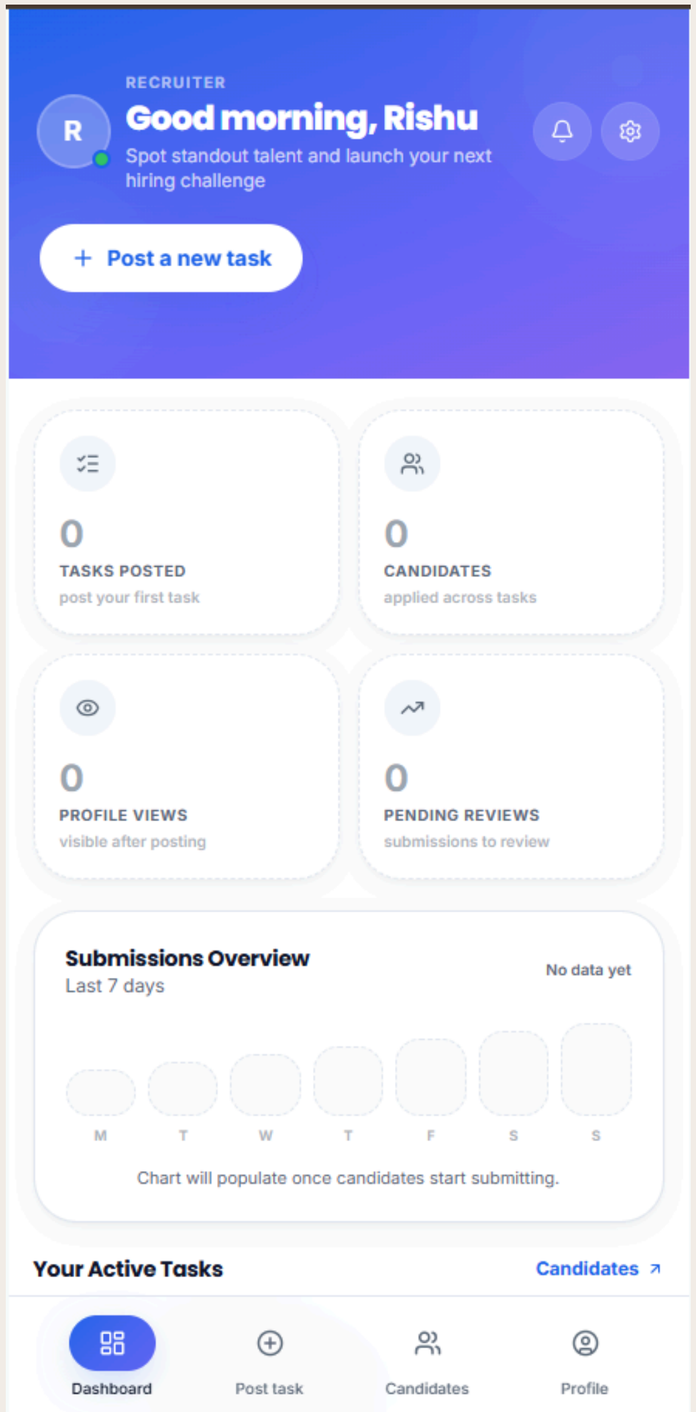
- 📢 Post Job – Create and publish job openings.
- 👥 View Candidates – Access applications and candidate profiles.
- ⭐ Evaluate Tasks – Review submissions using structured criteria.
- ✅ Shortlist – Select top-performing candidates for interviews.

Product Value:

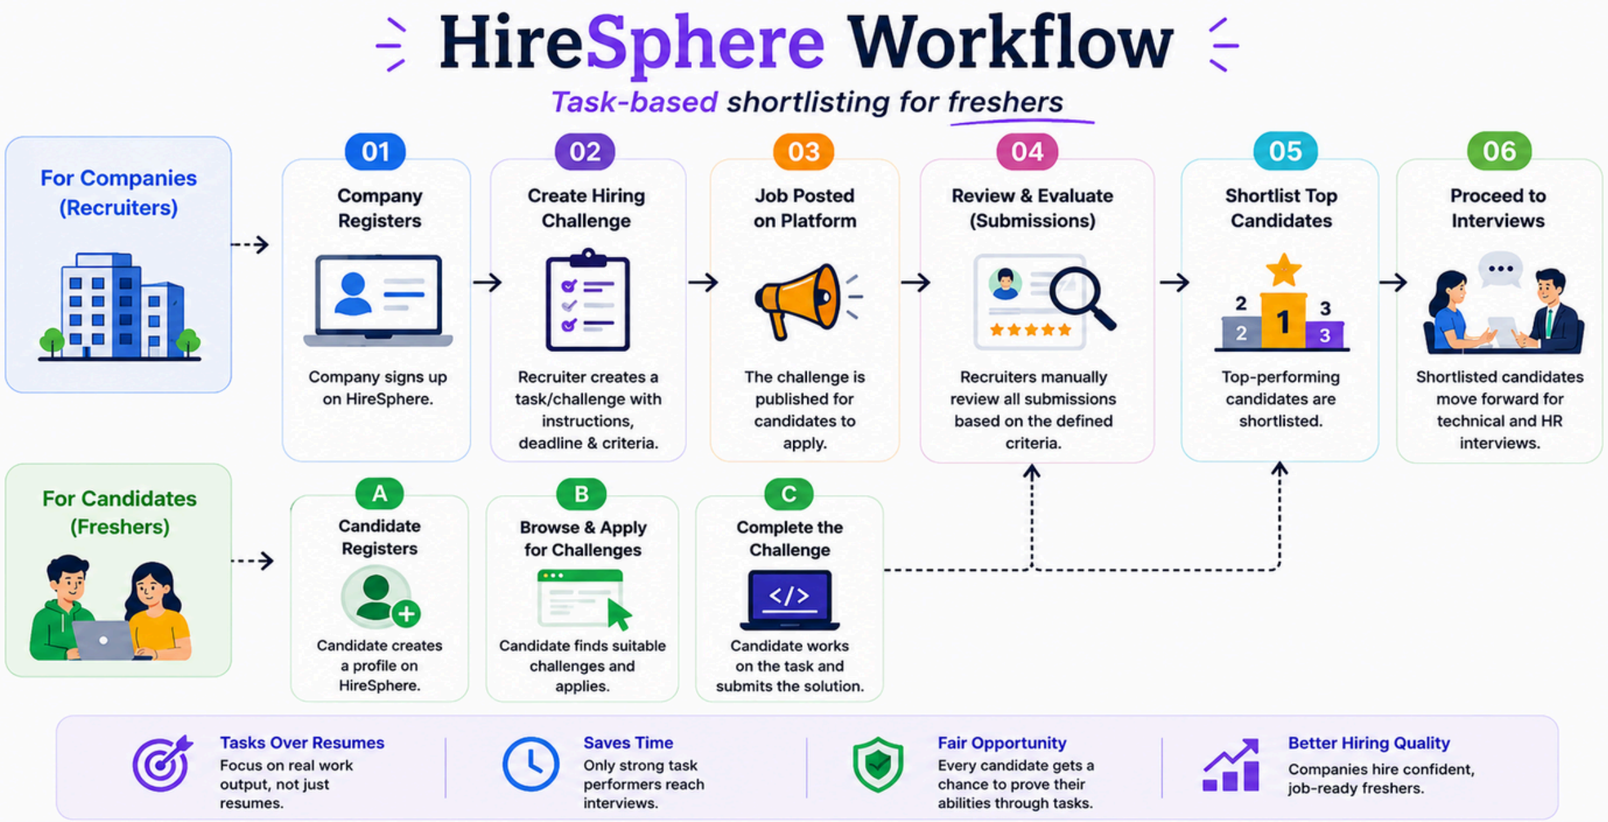
- Reduces resume screening time.
- Improves hiring quality.
- Supports skill-based recruitment.

Design Principles:

- Simple workflow
- Data-driven insights
- Easy filtering & search
- Consistent user experience



HOW IT WORKS:



TECHNOLOGIES USED

Powering HireSphere

1. FRONTEND

- **React.js** – Builds a fast and responsive user interface.
- **HTML5** – Structures web pages.
- **CSS3 / Tailwind CSS** – Modern and responsive styling.
- **JavaScript (ES6+)** – Adds interactivity and functionality.

React.js · HTML5 · CSS3 · Tailwind CSS · JavaScript

2. BACKEND

- **Node.js** – Handles server-side operations.
- **Express.js** – Builds RESTful APIs and manages application logic.

Node.js · Express.js

3. DATABASE

- **PostgreSQL** – Stores all application data securely.
- Stores users, companies, tasks, submissions, evaluations, etc.

PostgreSQL

4. AUTHENTICATION & SECURITY

- **JWT (JSON Web Token)** – Secure authentication.
- **bcrypt** – Password hashing.
- **Role-Based Access Control (RBAC)** – Different access for Recruiters, Candidates, and Admin.

JWT · bcrypt · RBAC

5. CLOUD & STORAGE

- **Cloudinary** – Stores resumes, project files, and submissions.
- **AWS S3** – Secure and scalable file storage.

Cloudinary · AWS S3

6. DEPLOYMENT

- **Vercel** – Frontend deployment.
- **Render** – Backend deployment.

Vercel · Render

7. VERSION CONTROL

- **Git** – Track changes in code.
- **GitHub** – Store and collaborate on code.

Git · GitHub

8. DEVELOPMENT TOOLS

- **VS Code** – Code editor.
- **Postman** – API testing.
- **Figma** – UI/UX design.
- **Canva** – Presentation & graphics.

VS Code · Postman · Figma · Canva

This tech stack enables **HireSphere** to deliver a fast, secure, scalable and user-friendly task-based hiring platform.

KEY FEATURES:

- 👤 Candidate Dashboard
- 🏢 Recruiter Dashboard
- 📄 Candidate & Recruiter Profile Management
- 📋 Task Creation & Submission System
- ⭐ Task Evaluation & Interview Shortlisting

TARGET CUSTOMERS:

Primary Customers

- Startups
- MSMEs
- IT Companies
- Product-Based Companies

Secondary Customers

- Colleges & Universities
- Placement Cells
- Bootcamps
- Online Learning Platforms

Target Industries

- Information Technology (IT)
- Software & SaaS
- FinTech
- EdTech
- HealthTech
- Manufacturing
- E-Commerce
- Digital Marketing
- Data Analytics
- Engineering Services

End Users

- Fresh Graduates
- Final-Year Students
- Recruiters
- Hiring Managers
- HR Teams

Market Demand:

- Growing demand for task-based and skill-oriented hiring.
- Increasing campus and fresher recruitment across startups and MSMEs.
- Organizations are adopting digital recruitment platforms to improve hiring efficiency.

Industry Size:

- Global HRTech Market: Expected to reach USD 95.95 Billion by 2034.
- Growing adoption of digital recruitment solutions in India across startups, MSMEs, and enterprises.

Growth Potential:

- Campus Recruitment
- Fresher Hiring
- Internship Recruitment
- Startup & MSME Hiring
- Enterprise Recruitment
- Global Expansion

COMPETITVE ANALYSIS:

COMPETITOR ANALYSIS

Features	HireSphere	LinkedIn	Naukri	Internshala	Unstop
Job Posting	✓	✓	✓	✓	✓

Unlike traditional job portals that primarily rely on resumes, HireSphere focuses on recruiter-defined, role-specific tasks as the primary shortlisting method before interviews.

SUSTAINABLE DEVELOPMENT GOALS(SDG):

🎓**SDG 4 – Quality Education:** Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

💼**SDG 8 – Decent Work and Economic Growth:** Improves employment opportunities for fresh graduates.Enables fair recruitment based on demonstrated abilities.

🏭**SDG 9 – Industry, Innovation and Infrastructure:** Build resilient infrastructure, promote inclusive and sustainable industrialization, and foster innovation.

⚖️**SDG 10 – Reduced Inequalities:** Provides equal opportunities for candidates regardless of college reputation or resume quality.

BUSINESS MODEL:

Revenue Streams:

- Recruiter Subscription Plans
- Premium Hiring Challenge Packages
- Campus Recruitment Services
- Enterprise Recruitment Solutions

Sales Channels:

- HireSphere Web Platform
- Direct Company Onboarding
- College Placement Drives
- Startup & MSME Outreach

Partnerships (Planned):

- Colleges & Universities
- Placement Cells
- Startup Incubators
- MSMEs
- IT & Product-Based Companies

Pricing Strategy:

- Free – Candidate Registration & Task Participation
- Basic – Small Startups & MSMEs
- Premium – Growing Companies
- Enterprise – Large Organizations & Universities

BENEFITS & IMPACT:

Economic Benefits:

- Lower recruitment costs
- Faster hiring

Social Impact:

- Equal opportunities for freshers
- Skill-based recruitment

Environmental Benefits:

- Paperless recruitment
- Digital hiring process

Employment:

- Better job opportunities
- Improved employability

Sustainability:

- Transparent recruitment
- Scalable digital platform

CHALLENGES FACED DURING DEVELOPMENT:

KEY LEARNINGS:

01 Product Thinking

Thinking like a PM to build solutions that create real value.

Solving real user problems 01
Focus on understanding user pain points deeply before building any feature.

Balancing user needs 02
Ensure the solution delivers value to users while aligning with business goals.

Prioritizing an MVP 03
Build the minimum viable product first and iterate based on real feedback.

02 UI/UX Design

Designing meaningful experiences that are intuitive, accessible and delightful.

Designing intuitive and accessible user interfaces. 01
Focus on clarity, simplicity and accessibility to make the platform usable for everyone.

Creating user journeys that reduce friction. 02
Map user flows and remove unnecessary steps to deliver a smooth and efficient experience.

Maintaining consistency across the platform. 03
Use design systems, reusable components and standards to ensure a seamless experience.

03 Technical Skills

Key technologies and tools used to build HireSphere.

React Frontend Development 01
Built responsive and interactive user interfaces using React, Tailwind CSS and reusable components.

Node.js & REST API Development 02
Developed scalable backend APIs using Node.js and Express for smooth data communication.

Authentication & Authorization 03
Implemented secure user authentication, role-based access control and protected routes.

Database Design with Supabase 04
Designed normalized database schema and managed data efficiently using Supabase.

Deployment & Hosting 05
Deployed the application on Netlify (frontend) and Render (backend) for reliable performance.

04 Product Management

Key product management principles applied throughout the project.

User-Centered Design 01
Designed solutions by deeply understanding user needs, pain points and behaviors.

Feature Prioritization 02
Focused on high-impact features that deliver maximum value with limited resources.

Requirement Analysis 03
Gathered, analyzed and documented requirements to build the right product.

Problem Solving 04
Identified key challenges and designed effective, scalable solutions.

Agile Development 05
Worked in iterative cycles, adapted to changes and delivered value continuously.

05 Professional Growth

Personal and professional learnings gained through building this product.

Cross-functional Thinking 01
Collaborated across different domains to understand user needs and deliver impactful solutions.

Decision Making 02
Made informed decisions by analyzing data, evaluating trade-offs, and focusing on long-term impact.

Communication 03
Articulated ideas clearly and aligned with stakeholders, team members, and users effectively.

Iterative Improvement 04
Continuously gathered feedback, tested ideas, and improved the product in every iteration.

End-to-End Product Development 05
Worked on the entire product lifecycle from ideation and design to development, testing, and deployment.

FUTURE SCOPE & CONCLUSION:

Future Enhancements:

- Mobile Application
- Live Coding & Technical Assessments
- Video Interview Integration
- Company Assessment Templates
- Digital Candidate Portfolio

Scalability:

- Expand from campus hiring to enterprise recruitment.
- Support multiple industries and job roles.
- Scale across India and international markets.

Expansion Opportunities:

- Campus Placements
- Internship Recruitment
- Startup & MSME Hiring
- Enterprise Recruitment
- Government Recruitment

Conclusion:

HireSphere redefines fresher recruitment by enabling companies to shortlist candidates through real-world tasks, creating a fair, transparent, and efficient hiring process before interviews.

THANK YOU
