RISHITHA KHANDESH

Hyderabad, India | +91 9849006895 | rishithakhandesh@gmail.com | https://www.linkedin.com/in/rishitha-khandesh-b766b330a/ | https://github.com/Rishitha772

PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering student specializing in Software Engineering, Backend Development, and Product Management. Skilled in Java, Spring Boot, REST APIs, and Cloud Computing (AWS), with hands-on experience building scalable backend systems and AI-powered applications using Generative AI and LLMs. Combines strong CS fundamentals in Data Structures, Algorithms, and System Design with product thinking to ship end-to-end, user-centric software. Seeking a Software Engineering, Backend Development, Product Management, Cloud, or AI internship.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, SQL, HTML5, CSS3
Development: Spring Boot, React.js, REST APIs, Hibernate/JPA, MySQL, Maven, Git, GitHub, Postman
Cloud Computing: AWS, Amazon EC2, Amazon S3, IAM, AWS Lambda, Amazon RDS, CloudWatch, VPC
Artificial Intelligence: Generative AI, Prompt Engineering, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), AI Chatbots, Natural Language Processing
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design
Product Management: Product Strategy, Product Roadmapping, User Research, Competitive Analysis, Feature Prioritization, Wireframing, Agile & Scrum, Go-to-Market Strategy

SOFT SKILLS

Leadership | Communication | Problem Solving | Analytical Thinking | Collaboration

PROJECTS

Lumora AI – AI-Powered Career Assistant *React, Spring Boot, MySQL, AWS*

- Built Lumora AI, an AI-powered career assistant offering personalized career guidance, resume analysis, interview preparation, and learning roadmaps via an intelligent chatbot powered by Generative AI and Retrieval-Augmented Generation (RAG) over Large Language Models (LLMs); architected a scalable, AWS-ready system with a React frontend, Spring Boot backend, REST APIs, and MySQL.

HireSphere – Skill-Based Hiring Platform *— Ongoing*

- Engineered HireSphere, a skill-first hiring platform pairing backend development with product strategy — architected a scalable Java/Spring Boot system and recruiter dashboard replacing resumes with task-based skill assessments, while leading user research, MVP planning, and product roadmapping.

In-Memory Cache System with LRU Eviction and TTL *Java, HashMap, Doubly Linked List, Multithreading*

- Engineered a thread-safe in-memory caching system in Java with O(1) get/put operations using HashMap and Doubly Linked List; implemented LRU eviction, TTL-based expiration, multithreaded background cleanup, and file-based persistence in a clean, modular architecture.

Distributed Rate Limiter – Token Bucket & Sliding Window *Java, HashMap, Queue, LinkedList, OOP*

- Built a distributed rate limiter for API protection, implementing Token Bucket, Sliding Window, and Fixed Window algorithms in Java to support scalable backend systems, with per-user request tracking and Retry-After header calculation.

MedAssist – Smart Patient Queue System *Python, Django, SQLite*

- Developed a web application using Django with a priority-based queuing algorithm to schedule patients and prioritize emergency cases based on symptom severity.

INTERNSHIP EXPERIENCE

Python Developer Intern — Infosys Springboard Internship 7.0 (Batch 2) *Jul 2026 – Present*

- Built Python-based solutions as a Python Developer Intern under the Infosys Springboard program, strengthening skills in programming and software development.

Green Intern — 1M1B Green Internship Program (Batch 7) *Jan 2026 – Jul 2026*

- Developed a software simulation of the TerraVolt smart energy-harvesting Mats-based system and ranked among the Top 30 of 1000+ interns, earning selection for the Workplace Experience Program in Bengaluru.

Vishwam.ai Summer of AI Internship Jun 2025 – Jul 2025

- Contributed to the development of a Telugu Large Language Model (LLM) through corpus creation and data validation.

LEADERSHIP EXPERIENCE

Product Lead — 1M1B Green Internship, Workplace Experience Program (Bengaluru) Jun 2026 – Jul 2026

- Owned the product end-to-end at the 1M1B Green Internship Workplace Experience Program in Bengaluru, driving cross-functional collaboration and user-centric product strategy — winning 1st place by delivering the final pitch to a panel of industry judges.

Founder — HireSphere May *2026 – Present*

- Defined the product vision and roadmap for HireSphere, an Android-based hiring platform, leading user research and MVP development as founder and technical lead to build a skill-first, task-based hiring solution.
- Conducted end-to-end product discovery for HireSphere — user research, competitor analysis, defining MVP scope and user personas, prioritizing features, and designing user journeys — culminating in a documented Product Management case study that validated the product vision.

EDUCATION

B.Tech, Electronics and Communication Engineering *Aug 2023 – May 2027*

Malla Reddy College of Engineering for Women, Hyderabad | CGPA: 8.55 / 10

HSC (XII): Kshatriya Junior College – 93.5% | SSC (X): ZPHS – 100%

CERTIFICATIONS & ACHIEVEMENTS

- Java Basics for Beginners, Java Performance Tuning and Memory Management, Linux for Cloud and DevOps Engineers, Modern AI with Zero Coding — Udemy (2026)
- AWS Cloud Practitioner Essentials — AWS Training (2024); Selected for Smart India Hackathon, Internal Round (College Level)
